

DROBTWEAKS

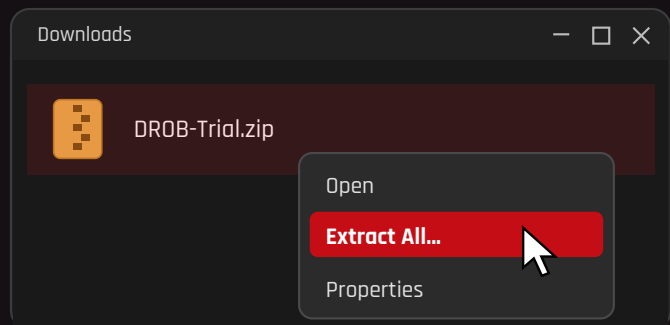

FREE TRIAL

QUICK START - 60 SECONDS

Your free trial is a small Windows tool. It scans your PC and applies 8 safe tweaks that you can undo any time. Nothing is installed and nothing is downloaded. Follow these 3 steps.

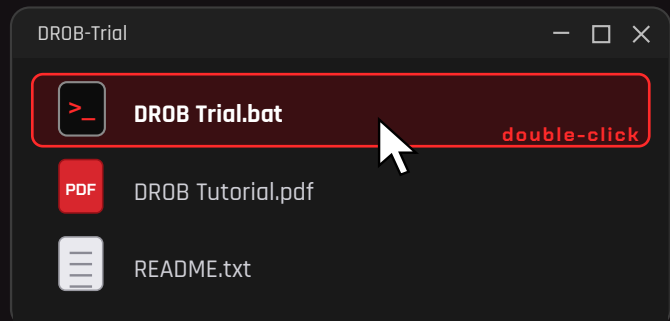

1 Extract the zip

Right-click DROB-Trial.zip and choose Extract All, then click Extract. Don't run the file from inside the zip.

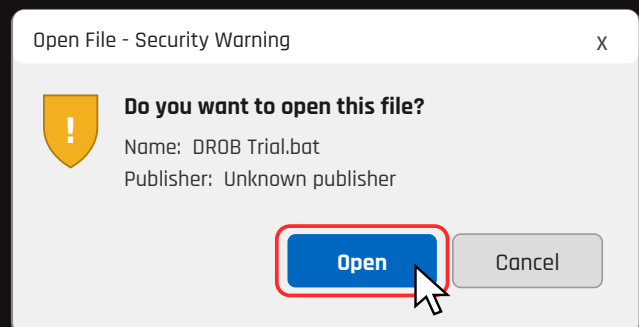

2 Open DROB Trial.bat

Open the extracted folder and double-click DROB Trial.bat. A black window opens with the DROB menu. No admin needed.

3 Allow it if Windows asks

Windows may ask if you want to open a downloaded file. That is normal for any script. Click Open. If you see a blue screen, click More info, then Run anyway.

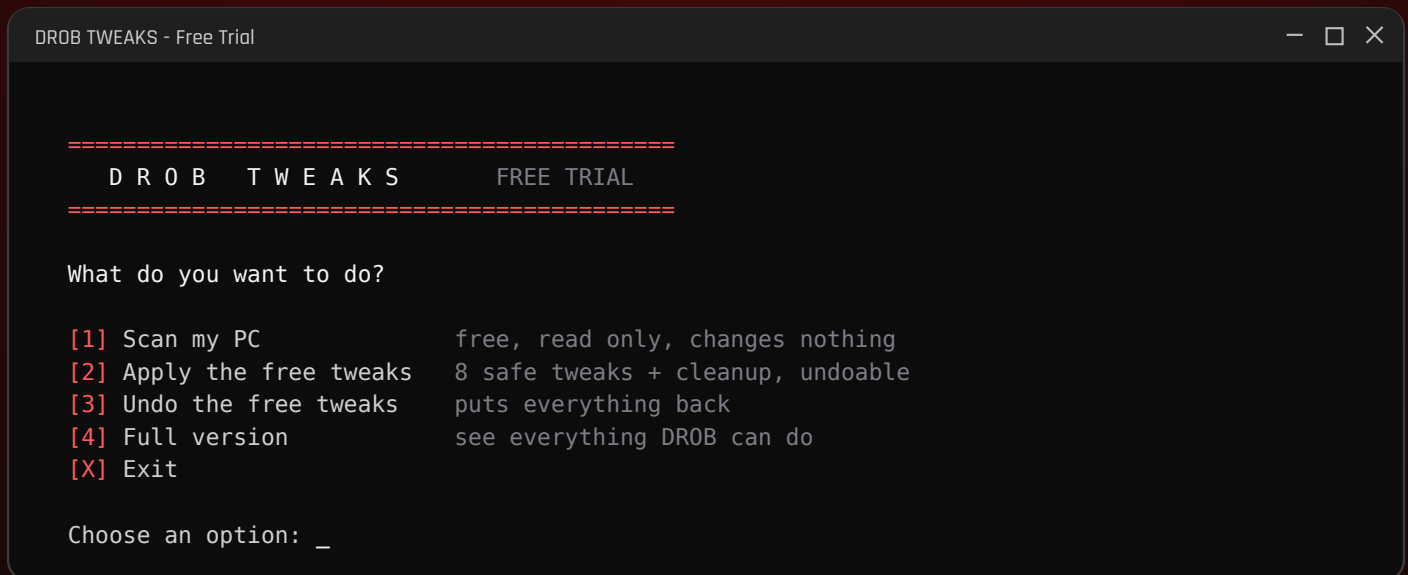

PRO TIP

Skip the warning: right-click the zip, choose Properties, tick Unblock, click OK. Then extract it. Windows won't ask again.

WHAT YOU WILL SEE

Using the menu

When you open the file, this window appears. Press a number key to choose. That's it.

1

Scan my PC

Reads your settings and shows what can be improved. It changes nothing, so it's safe to run first.

2

Apply the free tweaks

Applies 8 safe tweaks and cleans junk files. It asks Desktop or Laptop, and saves your original settings first.

3

Undo the free tweaks

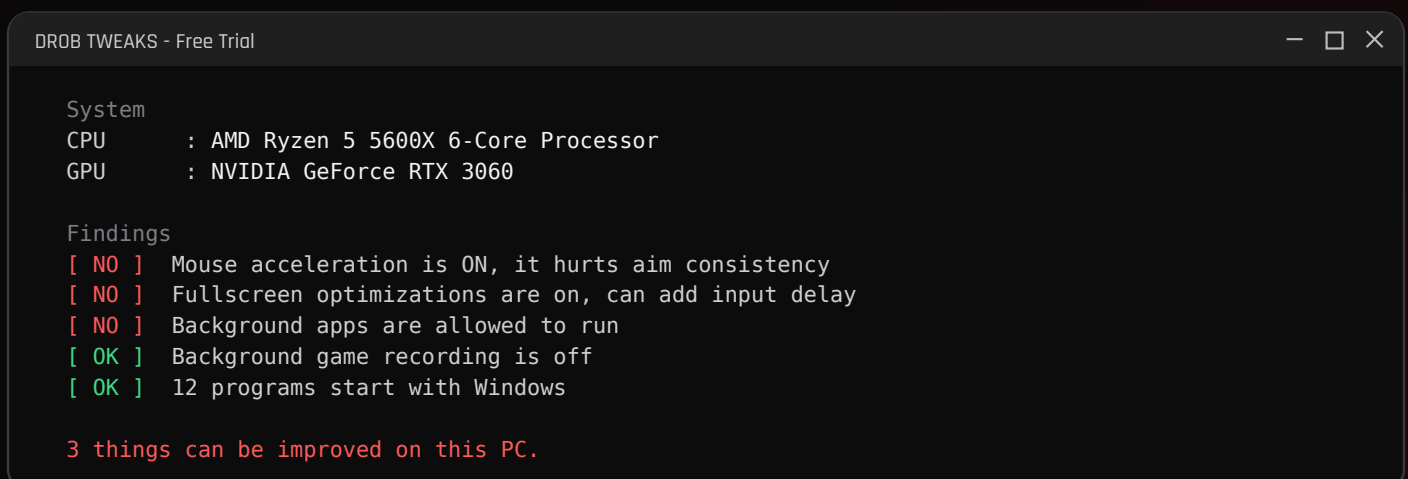

Puts your original settings back exactly as they were. Use it any time.

4

Full version

Shows what the full DROB tools add and opens drobtweaks.com.

EXAMPLE: WHAT OPTION 1 SHOWS

Example output. Your window shows your own PC.

WHAT OPTION 2 DOES

The 8 free tweaks

Each one changes a real Windows setting for your own user account only.

1

Mouse acceleration off

1:1 mouse movement for steadier aim

2

Sticky Keys popups off

No popup when you spam Shift in a game

3

Fastest keyboard repeat

Snappier key response

4

Game recording off

Stops background capture load

5

Fullscreen optimizations off

Can cut input delay in some games

6

Background apps off

Fewer apps running behind your game

7

Transparency effects off

Frees up a little GPU

8

Performance power plan

Desktops only, skipped on laptops

+ Bonus cleanup: removes junk files from your Temp folder and shows how many.

QUESTIONS

Is it safe?

Yes. No admin, nothing installed or downloaded, and it only changes your own Windows user settings. The .bat is plain text. Open it in Notepad to read every line.

How do I undo it?

Run DROB Trial.bat again and choose option 3. Your original settings come back. The temp cleanup only removes junk files.

Windows or my antivirus warned me.

Downloaded scripts trigger a warning on many PCs. Choose Open or Run anyway. If your antivirus flags it, don't turn it off. Add the DROB folder to its exclusions, or ask us on Discord.

Do I need to restart?

Sign out and back in after applying, so the mouse and keyboard changes fully take effect.

Will I get more FPS?

Results vary per PC. The trial fixes real settings for a smoother, more consistent feel. The full version goes much deeper.

WANT THE FULL VERSION?

100+ tweaks - 6 apps - bundles from \$30
